Tugas Modul 5

The screenshot shows the phpMyAdmin web interface. The left sidebar displays a database structure with 'praktikum' selected. The main panel shows the 'products' table with the following data:

	id	product_name	update_at	created_at
<input type="checkbox"/>	1	Margarin	2023-11-28 22:00:38	2023-11-28 22:00:38
<input type="checkbox"/>	2	Tepung	2023-11-28 22:01:59	2023-11-28 22:01:59
<input type="checkbox"/>	3	Telur	2023-11-28 22:03:28	2023-11-28 22:03:28

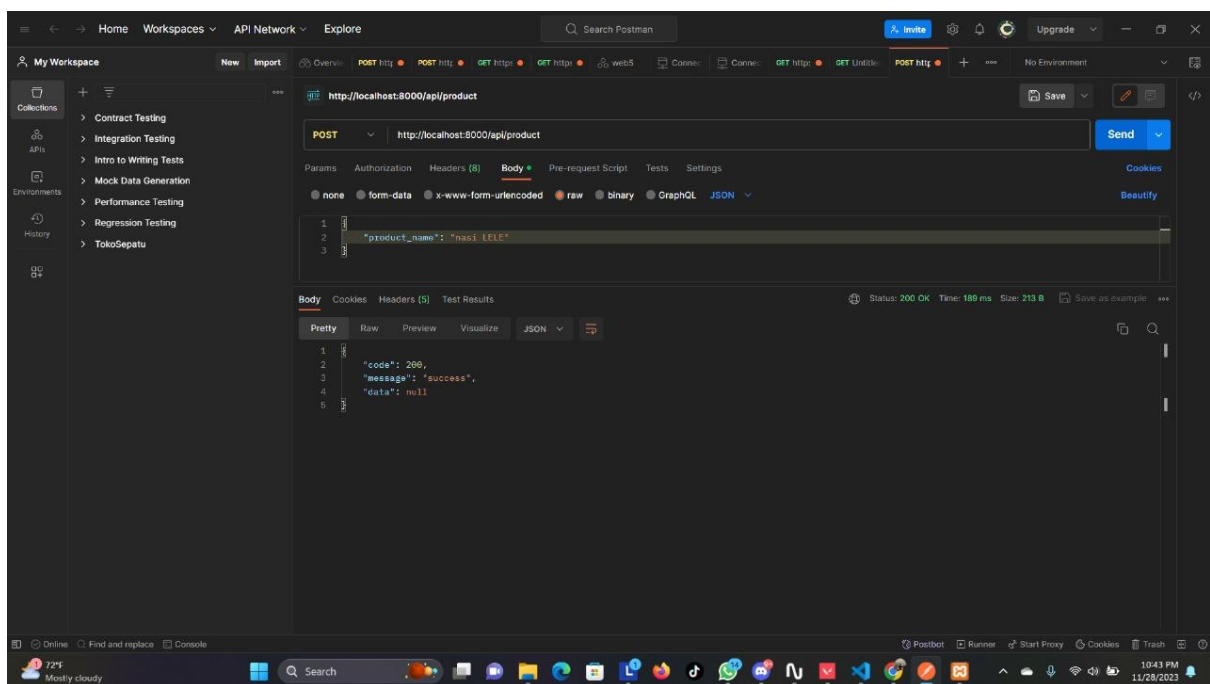

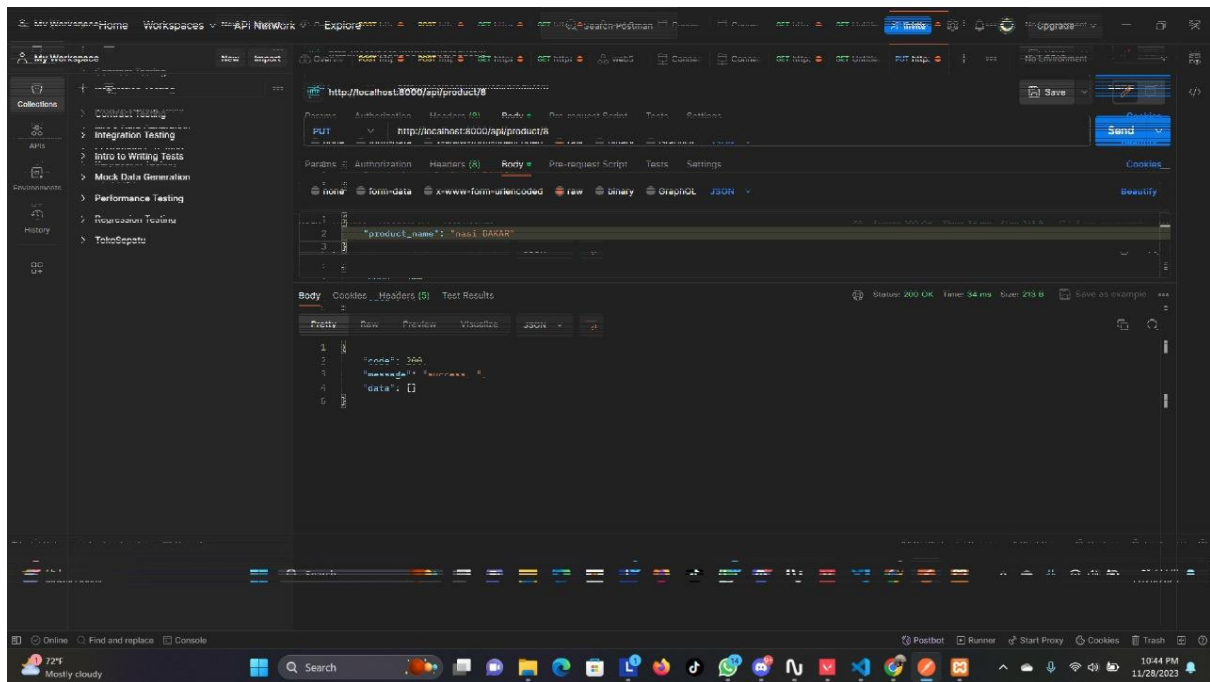

Below the table, there are buttons for 'Operasi hasil kueri' (Print, Salin ke clipboard, Ekspor, Tampilkan bagan, Buat tampilan) and a 'Konsol' tab.

The screenshot shows the Postman interface with a GET request to the endpoint `http://localhost:8000/api/product/2`. The response is a JSON object indicating success:

```
{
  "code": 200,
  "message": "success",
  "data": [
    {
      "id": 2,
      "product_name": "Tepung",
      "update_at": "2023-11-28 22:01:59",
      "created_at": "2023-11-28 22:01:59"
    }
  ]
}
```

The status bar at the bottom shows a 200 OK response with a 9 ms response time and 312 B of data.
